Install Checklist

1. Create a new MySQL database with new user that has full rights to it.
2. Upload iScripts EasyBiller files.
3. Run install script.
4. Delete install directory.
5. Customize as desired.
6. Test.
7. Go Live!

Installation

Create Database

Create a new MySQL database and new user with full rights to the database. Check with your server's control panel documentation for details on how to create databases on your system.

Upload files

Unzip the iScripts EasyBiller full install zip file with paths in your computer. Upload all files maintaining the directory structure.

OR

Upload the iScripts EasyBiller full install zip file and unzip on your server. If you do this, be sure your files are owned by the user who owns the site.

Run the install script

Open a new browser window. Surf to [http://\[your_ iScripts EasyBiller_ domain\]/install/install.php](http://[your_ iScripts EasyBiller_ domain]/install/install.php) (Substitute your domain name for [your_ iScripts EasyBiller_ domain])

Step 1:

The first screen contains 4 sections

1. Database Details section
2. Site Details section
3. Display & Image Settings section
4. Administration Details section
5. Invoice Engine Settings section

Database Details section

This section displays the following fields to fill

- a. Database Server Hostname – enter the hostname of your database server.
- b. Database Name – name of your database.
- c. Database User Name – database username.
- d. Database Password – database password.
- e. Database Prefix – specify a name as table prefix.

Site Details section

Enter the name of the site corresponding to the field ' Site Name '

Site URL – specify the site url

Display & Image Settings section

Site Logo - Browse the site logo

Administration Details section

Site administration details are recorded in this section. It displays the following fields

- a. Admin Login Name – administrator login name
- b. Admin Password – administrator password
- c. Confirm Admin Password – confirm the administrator password by reentering here
- d. Admin Email – email address of the administrator

Invoice Engine Settings section

Invoice details are entered in this section. This section displays the following fields

- a. Currency – the currency details can be selected from a drop down list which displays the available currency types.
- b. Invoicing Address – invoice address details are specified here.
- c. Supported Payment Methods - supported payment types are listed here. You can select the payment methods by enabling the corresponding checkboxes.

Finally the Authorize.net Payment Gateway Details are entered, which displays the following fields

- a. Authorize Login Id – login id
- b. Authorize Transaction Key – authorize transaction key
- c. Authorize Password – specify the password
- d. Authorize Email – email address needs to be entered here

After all the above details are filled click on “Continue” button to go to next step

Step 2:

If the installation is successful you will get the following message

“Congratulations! The Installation Process is completed successfully! ”

iScripts EasyBiller installation is complete!

Remove or rename and relocate the install directory. This is a security measure, you don't want anyone surfing to it.
